## **DETAILED ACTION**

1. This is regarding the Request for Reconsideration under 37 C.F.R. §1.111, and Remarks, filed 11/24/2006. Claims 1 – 27 remain pending in this Application.

### ***Response to Remarks***

1. Applicants' arguments stated in their Remarks, filed 24 November 2006, with respect to the rejections of claims 1 - 3, 5 – 7, 9, 12 – 19, 21, 22 and 24 - 27 under 35 U.S.C. 102(e) and claims 4, 8, 10, 11 and 23 under 35 U.S.C 103(a) have been fully considered and are persuasive. Therefore, the Examiner has withdrawn these rejections. However, upon further consideration, new grounds of rejections are made, as outlined below.

### ***Claim Rejections - 35 USC § 101***

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1, 21 and 27 are rejected under 35 U.S.C. 101 because the claimed invention is not supported by either a specific and substantial asserted utility or a well-established utility.

Claims 1, 21 and 27 cite "manipulating the kerf data by use of kerf processing using the same manipulation process as for the chip data". However, these claims do not describe any utility produced by the kerf data manipulation. Merely manipulating kerf data does not produce tangible or concrete results, and thus lacks utility.

Claims 1, 21 and 27 are also rejected under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either a specific and substantial asserted utility or a well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention.

### ***Allowable Subject Matter***

4. Claims 15 - 20 allowed.
5. Claims 1 –14 and 21 - 27 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 101 and 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
6. The following is a statement of reasons for the indication of allowable subject matter: prior art does not teach the claimed limitations pertaining to the method for generating kerf data by assembling previously designed and stored kerf features, and concurrently creating kerf design data and chip design data by using same parameters for both kerf and chip design data.
